

**Key elements;** Art, DT, maths, problem solving, communication, listening, teamwork, imagination

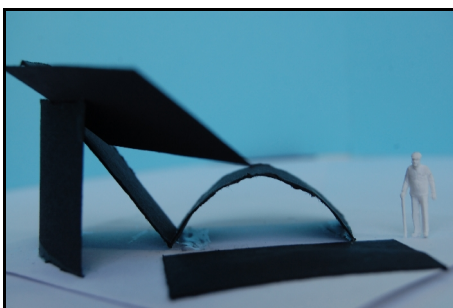

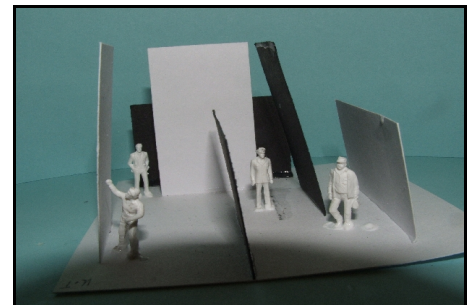

*Architecture can be best described as the creation and manipulation of space.*

*Architecture Workshops Design Days are designed to explore this idea through a series of playful hand-on activities.*

*Pupils explore complex architectural ideas simplified to make them accessible. such as measurement, scale, ergonomics, and the perception of space and how it relates to visual form.*

*Developed to help the spatial awareness and visualisation skills of Gifted & Talented Yr 5 & 6 pupils.*

*Throughout the day pupils are asked to consider, discuss, and evaluate their own and one another's work.*

*There are no right or wrongs during the Design Day, but active participation is essential for pupils to gain the maximum benefit.*
